this book offers a critical engagement with contemporary ir textbooks via a novel folklorist approach two parts of the folklorist approach are developed addressing story structures via resemblances to two fairy tales and engaging with the role of authors via framing gestures the book not only looks at how the idea of social science may persist in textbooks as many assumptions about what it means to study ir but also at how these assumptions are written into the defining stories textbooks tell and the possibilities for re negotiating these stories and the boundaries of the discipline this book will specifically engage with how the stories in textbooks constrain how it is possible to define ir through its re production as a social science discipline in the first part story structures are explored via donkeyskin and bluebeard stories which the book argues resemble some structures in textbooks that define how it is permissible to tell stories about ir in the second part the role of authors is explored via their framing

in the past twenty years the study of urban politics has shifted from a predominant concern with political culture and ethos to a preoccupation with political economy particularly that of urban development urban scholars have come to recognize that cities are shaped by forces beyond their boundaries from that focus have emerged the views that cities are clearly engaged in economic competition that market processes are shaped by national policy decisions sometimes intentionally and sometimes inadvertently and that the costs and benefits of economic growth are unevenly distributed but what else needs to be said about the policies and politics of urban development to supplement prevailing theories the politics of urban development argues that the role of local actors in making development decisions merits closer study whatever the structural constraints politics still matters collectively the essays provide ample evidence that local government officials and other community actors do not simply follow the imperatives that derive from the national political economy they are able to assert a significant degree of influence over the shared destiny of an urban population the impact of the collection is to heighten awareness of local political practices and of how and why they make a difference
